for parents, caregivers and those who work with children and youth

Toilet Training

Is your child getting older and still “not interested” in toilet training?
Are you struggling with how to toilet train your child, but want to get it done?

If this is you, join this series of webinars to learn how to:

- create a detailed toilet training plan that fits your child and your life
- toilet train your child effectively and efficiently
- teach related activities to toileting such as wiping and staying dry at night

Intended for: All parents and caregivers of children aged 3 years to 18 years. The approaches presented are especially effective for children with developmental challenges.

Length of session: 1 hour

*There are 5 webinars in this series

Type of session: Live online session on Zoom

Developed and Delivered by: AHS occupational therapists
